12. Evaluating Progress Toward Measurable Goals MCM 3

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

Perform storm drain system monitoring activities (e.g., flow monitoring, up-the-pipe inspections) as specified by other environmental permits or in response to discovered or public reported conditions.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

Rainfall and flow data from 2 flow meters in storm sewers were assessed for potential illicit discharges. No illicit discharges were identified from the data evaluation. During this period, a DASNY-led campus building renovation project was observed to not have effective sediment control measures in place resulting in mud tracking onto paved areas. The DASNY rep. was notified immediately & the appropriate corrective measures were implemented within 1 business day.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

College EH&S and Planning offices to conduct monitoring (field inspections) of construction and qualified inspector contractor project activities to ensure contractor SWP2 Plan implementation required by the DEC General Permit for storm water discharges from construction activity. Also, EH&S performs oversight inspections to address any concerns reported by the public.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

Oversight inspection was performed at the only construction project with > 1 acre disturbance that was active during this reporting cycle. In addition, three (3) monitoring/inspections were performed at smaller (< 1 acre disturbance) projects. Deficiencies identified during inspections were immediately reported to the cognizant SUCF, DASNY, and contractor representatives, who initiated corrections.

C. How many times was this observation measured or evaluated in this reporting period?

1. Choose/list each municipal operation/facility that contributes or may potentially contribute Pollutants of Concern to the MS4 system. For each operation/facility indicate whether the operation/facility has been addressed in the MS4's/Coalition's Stormwater Management Program(SWMP) Plan and whether a self-assessment has been performed during the reporting period. A self-assessment is performed to: 1) determine the sources of pollutants potentially generated by the permittee's operations and facilities; 2) evaluate the effectiveness of existing programs and 3) identify the municipal operations and facilities that will be addressed by the pollution prevention and good housekeeping program, if it's not done already.
